

Manual evaluation form Creating Contacts for Accredited Organisations

In case it is difficult to "thick" in the alternatives, please just write on the line I have made here.

Please send it back to tca@uhr.se within 30 days from today.

Dear participants,

It was so nice meeting you all in Helsingborg!

Time just flew but we had a great time together! This was not the end of your accreditation, just the beginning!

To be able to continue follow-up, reporting and get together the summary of this Long Term TCA I really need your answers to the evaluation. This is also important for our common TCA work. So please fill in this form and I would be very happy to receive it. Thanks a lot in advance!!

NB There is a question about submitting an application for Erasmus+. This may be relevant for some of you and you may answer according to your own thoughts but it is impossible to remove this question, so you choose how you want to answer to this. You already have the accreditation but some of you may be into applications anyway, so feel free.

How satisfied were you with the speakers Adelina Stuparu and Daniela Meaglia No. 3?

They both gave us their own views about how accreditation can be implemented and good pieces of advice to overcome obstacles. Building up good collaborations with reliable partners remains the core issue. I was satisfied and asked them questions during informal chats.

Comments, suggestions

Some feedback on the study visits - did you get any information on how the organisation you visited work with their accreditation? If yes, please describe very shortly how.

I visited a primary school and the principal explained us they have integrated the different accreditation actions within their curricula without changing much of their daily school routines. When students and teachers from other countries spend a period of time in their institution for a jobshadowing experience or a short-term mobility, for example, they attend almost all classes even if they don't understand Swedish, because they can better focus on techniques and behavior, gestures.

How to use the budget in the most efficient way, according to you?

In order to use the whole budget you can change actions. For example, if you haven't applied for any long-term mobility, but you've realized some of your students can make it to spend at least 30 days in a foreign country and come back enriched by the experience, you can decide to change action, or any other action to make the most out of the budget, giving reason for that.

How to include the accreditation in your organisation? Experiences from the TCA?

We can build up collaborations using eTwinning twinspace that can pave the way for future mobility actions. We've just become an eTwinning school.

Thank you, again!
