TCA DESCRIPTION

Themes and goals:	In view of the rising climate change and the pace of digitalization, today's schools are facing great challenges. The conference will focus on the following questions in particular: What knowledge do teachers need to meet the challenges and how can Erasmus+ contribute to the acquisition of this knowledge? What conditions are necessary to create an optimal learning atmosphere and inclusive setting in schools? How can Erasmus+ projects - eTwinning included - contribute to this goal?
Expected results:	The conference will present innovative projects on digitalization and sustainable education with a focus on teacher training. It will approach the topic of 'diclusion' (digital inclusion). The conference will highlight ways in which schools and teachers can profit from eTwinning and the European School Education Platform. In exchange with each other and with the help of experts in the field, the participants will discuss and develop concepts for teacher training and school development. The conference will offer networking opportunities for schools and teacher training institutions to find partners and initiate new projects (mobility projects, cooperation projects, eTwinning projects).
