

Study Visit on Sustainability in Schools

MAIN INFO

SALTO E&T link:	https://salto-et.net/events/show/DE03_0540_TSS_2023		
Sector:	SE VET	Priority:	Environment and fight against climate change (2021-27)
Scope:	Transnational		
Type of presence:	Face-to-Face	Venue country:	Germany
Venue city:	Bonn	Working language:	English
Key Action:	KA1	TCA documents:	Programmentwurf_13.1 1.23.pdf
Postponed:	No	E+ Academy:	No
Start date:	11.03.2024	End date:	14.03.2024
Subtopic:	newcomers sustainability capacity building in impact and dissemination networking teaching interactive equal opportunities raising awareness		

TCA DESCRIPTION

Themes and goals:	<p>The study visit programme is aimed at teachers or head teachers who would like to gain an insight into the school practice of schools in Germany that are particularly dedicated to the topic of sustainability. Visits will be made to schools in the area of Bonn and surrounding region that have made special use of Erasmus school projects for sustainable school development. The study group will also visit the Ahr Valley, which was badly affected by the 2021 floods. The programme will provide several opportunities to exchange experiences and make contacts for Erasmus-projects. eTwinning and the European School Education Platform will be presented as a means to collaborate. Furthermore, the German organisation Engagement Global will host a workshop on the implementation of the 17 Sustainable Development Goals (SDGs) in everyday school life.</p>
Expected results:	<p>The programme aims at the professionalisation of (head) teachers on the topic of sustainability in schools and facilitates networking between EU countries to support project planning.</p>
Additional information:	<p>Applicants are expected to actively participate in the programme and to share their own experiences with projects on sustainability in schools.</p>

PARTNERS AND PARTICIPANTS

Organiser NA:	DE03 - Nationale Agentur für EU-Programme im Schulbereich im Pädagogischen Austauschdienst der Kultusministerkonferenz																							
Number of participants:	40																							
Target group:	School leaders, directors Teachers																							
Erasmus+ Programme experience level:	Newcomers and Experienced beneficiaries																							
Profile of participants:	Representatives from secondary schools who are interested in the topic and in starting Erasmus-projects including eTwinning. (pupils aged 10-19/20 appr.)Up to 3 participants per country.																							
Participants per country:	3 - Any																							
Sending partner(s) - Booked places:	<table border="1"> <tr> <td>AT01 - 4</td> <td>BE02 - 3</td> <td>CY01 - 2</td> <td>DE02 - 2</td> <td>DE03 - 6</td> <td>DK01 - 2</td> <td>EL01 - 3</td> </tr> <tr> <td>FR01 - 3</td> <td>HR01 - 3</td> <td>IE01 - 2</td> <td>LT01 - 3</td> <td>LV01 - 3</td> <td>NL01 - 3</td> <td>PL01 - 4</td> </tr> <tr> <td>SI01 - 2</td> <td>SK01 - 2</td> <td>BE03 - 3</td> <td>MK01 - 3</td> <td>PT01 - 3</td> <td>SE01 - 4</td> <td>RS01 - 2</td> </tr> </table>			AT01 - 4	BE02 - 3	CY01 - 2	DE02 - 2	DE03 - 6	DK01 - 2	EL01 - 3	FR01 - 3	HR01 - 3	IE01 - 2	LT01 - 3	LV01 - 3	NL01 - 3	PL01 - 4	SI01 - 2	SK01 - 2	BE03 - 3	MK01 - 3	PT01 - 3	SE01 - 4	RS01 - 2

Start date:

10.2021

End date:

12.2024

**Rationale and
 background:**

The new programme generation Erasmus+ starts off in a challenging time. Covid-19 is still dominating discussions on education, mobility and European cooperation as well as accelerating the demand for smart digital solutions throughout the European Union and its programmes. Even though these issues still capture the attention (and time) of most NAs, we are all finding our paths towards the so-called “new normal”. Part of this new normality is to recollect and revive long-term goals as well as introduce new ways to thrive in the upcoming future. The important discussion on sustainability and greening Erasmus+ is one that survived Covid-19 and even gained in relevance. Already before Covid-19, it was announced that Erasmus+ will entail a new priority on sustainability. Therefore, we as NAs are at the core when it comes to make sustainability a priority within our organisations and to enable beneficiaries to engage into transnational cooperation among each other to improve qualitative implementation of the programme even further. Nevertheless, the formal tie of sustainability and greening as a priority in the Erasmus+ program is relatively new. In 2020 the horizontal priority “environmental and climate goals” was introduced. However, other already existing frameworks show that we can tackle the climate topic in a holistic approach, namely sustainability. The European Commission hopes to link the two topics – coronavirus and the climate. It is proposing a €750 billion recovery package entitled “Next Generation EU”, with funds going towards the ecological transformation of the economy – charging points, the renovation of buildings and the hydrogen economy. The European Commission also presented its industrial strategy in connection with the Green Deal in March 2020. One of its focal areas is decarbonising energy-intensive industry and establishing a hydrogen economy. The aim is to produce the gas with the aid of renewable energy and use it to make sectors such as steel production or heavy vehicle traffic more climate-friendly. It also comprises a right to repairs, the recycling of batteries, replacing disposable packaging with reusable alternatives, and collecting and recycling more textiles and electrical appliances, or ensuring that they last longer. In March 2020, the European Commission presented a proposal for a new climate regulation as a central element of its Green Deal. This entails the EU achieving net climate neutrality by 2050, meaning that climate gases may still be emitted, but they must be offset elsewhere. In April 2021, a deal on the European Climate Law has been reached, making legal obligations of the goals stipulated by the European Green Deal to create a climate-neutral Europe by 2050 and reduce net greenhouse gas emissions by at least 55% by 2030. During its Presidency of the Council, Germany has taken up the discussion on sustainability in education and

research. The German federal government's website provides details of its work. One of the main developments of Germany's council presidency is the Osnabrück Declaration, which defines vocational education and training as an enabler of recovery and just transitions to digital and green economies. Sustainability should be a guiding principle for all Erasmus+ projects. Future projects should be designed in an eco-friendly way and should incorporate green practices in all its facets. Organisations and participants should have an environmental-friendly approach when designing the project, which will encourage everyone involved in the project to discuss and learn about environmental issues, reflecting about what can be done at different levels and help organisations and participants to come up with alternative, greener ways to implement project activities. The new programme aims to support, across all sectors, awareness-raising about environmental and climate change challenges. Priority will be given to projects aimed at developing competences in various sustainability-relevant fields, developing green sectorial skills strategies and methodologies, as well as future-oriented curricula that better meet the needs of individuals. The programme supports the use of innovative practices to make learners, staff and youth workers true factors of change (e.g. save resources, reduce energy use and waste, compensate carbon footprint emissions, opt for sustainable food and mobility choices, etc.).

Challenges:

Increase of the (potential) impact of Erasmus projects regarding sustainability practices
 Development of a strategy to reach beneficiaries and encourage them to engage with sustainability
 Facilitation of exchange and discussion between beneficiaries to help them develop their own approach to green initiatives
 Communication of the benefits of working on sustainability at both the European and national levels to the Erasmus community
 Communication of the significance and urgency to act on climate change in all parts of society
 Creation of a common understanding of guiding principles in sustainability. (emissions, food produce, less resource use, less waste, more local produce, reproducing crops, less plastic, less use of pesticides..)

Planned Activities:

See connected activities

Expected results:

The LTA sustainability aims at encouraging more potential programme participants to engage in mobility or projects to increase their knowledge on principles and models of sustainability, and to facilitate more national engagement in the long-term perspective. The LTA should create a space for shared insights and experience sharing on green initiatives. The participants of the activities in the framework of the LTA sustainability should also include experienced beneficiaries to share approaches and talk about their motivation to work on green initiatives. The LTA will focus on capacity building and green initiatives, especially in Education for Sustainable Development.
