TCA DESCRIPTION

Themes and goals:	<p>The main goal of the seminar is to increase awareness and understanding of the Erasmus+ horizontal priority “Environment and fight against climate change“. The seminar will support the participants in understanding the possibilities of carrying out Erasmus+ projects in a sustainable and environmentally responsible way. We will tackle the topics of project implementation, travel, and event organisation from the point of view of sustainability, as well as cover other green practices in education. Participants will be able to hear from experts on the subjects, learn from good practice examples and share their own experiences and ideas about implementing Erasmus+ projects in a sustainable and environmentally responsible way. The programme will also include a site visit and joint dinners. This seminar aims to attract and engage Erasmus+ beneficiaries (both Key Action 1 – learning mobility and Key Action 2 – partnerships for cooperation) in all fields of education and training - school education (SCH), vocational education and training (VET), adult education (ADU) and higher education (HED).</p>
Expected results:	<p>As a result of the seminar, we expect the participants to have a better understanding of the Erasmus+ horizontal priority of environment and fight against climate change. The guest lectures, good practice examples and group discussions should provide the participants with new ideas how to implement their projects in a sustainable and environmentally responsible way. The international setting of the seminar is expected to create opportunities for networking and finding new potential partners for future cooperation.</p>
Additional	<p>The seminar will take place in Tallinn, Estonia. The National Agency will cover</p>
