Sector:	VET	Priority:	Increase the quality of programme implementation (2021-27)
Scope:	Transnational		
Type of presence:	Face-to-Face	Venue country:	France
Venue city:	Lyon	Working language:	English
Key Action:	Not applicable	TCA documents:	Practical Information _ AutoSkills Europe in the Automotive Services Sector.pdf
Postponed:	No	E+ Academy:	No
Start date:	07.10.2026	End date:	09.10.2026
Subtopic:	mobility outcomes networking strategic partnership validation of learning		

TCA DESCRIPTION

Themes and goals: ANFA is a 75-year-old French association dedicated to Vocational Education and Training (VET) in the Automotive Services Sector. ANFA coordinates a network of more than 400 VET schools all around France. The automotive services sector represents training for all vehicle-related activities after production for cars, trucks, motorcycles, and bicycles. This sector is growing in Europe as the average age of the vehicle fleet is becoming higher. It is also a sector in transition with the emergence of new tools and electric vehicles. For more than 30 years, ANFA has been involved in European mobility. Very active in different European networks such as NETINVET and EFVET, ANFA brings strong expertise and supports VET institutions in developing European mobility in the automotive services sector. Each year, more than 900 apprentices from France in the sector take part in a European mobility project, and the organization wishes to increase this number by offering more opportunities to the apprentices. The event :After a successful first edition of AutoSkills Europe, ANFA is organizing its second edition from October 7th to October 9th, 2026, in Lyon and its surroundings. This TCA is co-organized by the Erasmus+ French Agency and is managed administratively and logistically by ANFA. The goal of the event is to gather staff involved in the organization of European mobility projects (mostly KA1 but also KA2) in the automotive services sector to create in-person contact with other countries, leading to new qualitative mobility projects. It will contribute to making long-term partnerships with reciprocal projects while

being able to share about the specificities in this sector. Program :The event will include a study visits event with visits to French schools and VET centers (day 1), one opening evening (day 2) and a one-day seminar including workshops and a match-making session (day 3).The study visits will be dedicated to European participants (day 1 and 2). Participants will have the opportunity to visit two training institutions involved in European mobility and one company (visits to be confirmed later at a later date). These visits will showcase the different training opportunities and infrastructure types in France with guided tours conducted VET professionals. The company will be in direct link within the automotive services sector.On day 3, the seminar will be composed of two workshop sessions, on different topics such as certifying mobilities, how to introduce mobility into training programmes, hybrid mobility, automotive trends, and KA2.The matchmaking session will allow participants to plan meetings between each other according to the specificities of their trainings (cars/trucks/cycle/motorcycle & level EQF3,4,5).

Expected results:

The expected results are :To increase mobility in the automotive services sector.To create or reinforce strong relationships between European and French training organizations to implement different mobility projects (individual, group, staff, blended, certifying mobility...)To share good practices, find common grounds and improve the setting up of mobilities in the automotive services sectorTo gain a better understanding of the opportunities and challenges specific to the European mobility in the automotive services sector and to favor the emergence of KA2 cooperation projectsTo gain a better understanding of the training paths in France and in Europe.Ideally, the selected participants will arrive at the seminar with well-developed ideas to implement, actively seeking European partners. Participants ought to be willing to share ideas, tools and good practices examples. Participants will be able to book meetings for the match-making session before the beginning of the seminar and to look at the participants' list in order to see the different trainings represented.The participants will be the staff involved in the organization of European mobility in training institutions within the automotive service sector and their counterparts.

Additional information:

In France, the industry and construction side is separated from the services sector (after production). It is important to note that this event is aimed at VET institutions in the automotive services sector, related to all post-production activities.Expected audience: +/- 175 participants are expected in total.30 new European participants from the collaboration with national Erasmus agencies50 European participants from our existing partners in the automotive industry65 French mobility coordinators from our network of schools20 national and European institutions involved in mobility or in the automotive service sector (companies, national representative)10 staff membersThe schedule: The seminar will take place in Lyon, at Lyon Marriott Hôtel Cité Internationale. European participants will have a slightly different schedule than French participant :European participants are expected to be in Lyon by Wednesday 7th October, 13:30 to start with an afternoon of study visits.French participants are expected to be in Lyon by Thursday 8th October, 18:00.All participants will be able to leave starting from Friday 9th 15:30.Travel arrangements should be made accordingly.Costs covered :2 nights (break-fast included), on 7-8/10 and 8-9/10, already reserved and paidTransport to and from the study visits2 lunches on 8/10 and 9/10 and 1 cocktail dinner A free evening (October 7th) will be held, which means that each participant will dine at their own expense.Working language: The working language will be English. No

interpreters are planned. English, not being the first language of all the participants, no minimum level is required. In addition, the goal for participants is to meet and build genuine relationships with one another, it is important they find ways to communicate.

PARTNERS AND PARTICIPANTS

Organiser NA: FR01 - Agence Erasmus+ France / Education Formation

Number of participants: 175

Target group: School leaders, directors Teachers Trainers School authorities Other

Erasmus+ Programme experience level: Experienced beneficiaries

Profile of participants: The participants expected are persons involved in the planning of European mobility in organizations that offer Vocational and Education Training (VET) in the automotive services sector – meaning in cars, trucks, bikes or motorbikes. The training levels expected are EQF 3, EQF 4, EQF 5 from VET institutions. Public institutions, private institutions, training centers, vocational high schools are all encouraged to apply. Participants need to be actively looking for partners and willing to organize KA1 mobilities or KA2 cooperation projects. They need to be already involved in the Erasmus programme or have a real intention to participate in mobility projects to create exchanges after their participation. ANFA is encouraging reciprocal projects, so participants need be willing to send and host students and/or staff. The French participants will be selected within ANFA's national network, representing VET training centers, vocational high schools across France, with training programmes in the automotive services sector in cars and/or trucks and/or bikes and/or motorbikes. All involved in the European mobility scheme or actively wishing to develop it.
