TCA DESCRIPTION

Themes and goals:	<p>The conference will examine the latest evidence, data sources and methodological approaches used to assess the socioeconomic impact of Erasmus+ and international student mobility. It will also explore how mobility can be strategically leveraged to contribute to local development, labour market needs and national policy objectives. Key themes include: Conceptual and methodological approaches to assessing the socioeconomic impact of student mobility, including individual outcomes as well as economic, social and regional development dimensions Institutional strategies and operational models that link mobility to graduate employability, skills development and engagement with local and regional economies, supported by enabling national policies and funding frameworks Mobility as a driver of university–business–government collaboration, strengthening partnerships with employers and social partners to address labour market needs Leveraging Erasmus+ instruments — such as traineeships, civic engagement activities and joint programmes — to maximise the long-term socioeconomic impact of student mobility</p>
Expected results:	<p>A deeper and more evidence-based understanding of the socioeconomic impact of Erasmus+ student mobility at institutional, regional, and national levels Concrete inspiration, tools and good practices to better measure, communicate and maximise this impact Clear entry points for collaboration between higher education institutions, Erasmus+ National Agencies, businesses and local authorities, strengthening the triple helix dimension of student mobility More coordinated, strategic and impact-driven approaches to Erasmus+ student mobility, aligned with institutional priorities and regional development objectives</p>
